No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1986 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

NUMBER 1, NOVEMBER 1986

|                                                                                                                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| KURT BERNARDO WOLF. Symmetry in Lie Optics . . . . .                                                                                                                                                  | 1   |
| NOBUYOSHI OHTA, HIROAKI SUGATA, AND HIROSHI YAMAGUCHI. $N=2$<br>Harmonic Superspace with Central Charges and Its Application to Self-<br>Interacting Massive Hypermultiplets . . . . .                | 26  |
| G. FELDMAN AND T. FULTON. The Relativistic Hartree-Fock and Random<br>Phase Approximations for Many-Electron Atoms . . . . .                                                                          | 40  |
| H. NISHIOKA, J. J. M. VERBAARSCHOT, H. A. WEIDENMÜLLER, AND S.<br>YOSHIDA. Statistical Theory of Precompound Reactions: The Multistep<br>Compound Process . . . . .                                   | 67  |
| V. M. DUBOVIK AND S. V. ZENKIN. Formation of Parity-Nonconserving<br>Nuclear Forces in the Standard Model $SU(2)_L \times U(1) \times SU(3)_c$ . . . . .                                              | 100 |
| GUNDUZ CAGINALP. The Role of Microscopic Anisotropy in the<br>Macroscopic Behavior of a Phase Boundary . . . . .                                                                                      | 136 |
| J. FLORES, G. LÓPEZ, G. MONSIVAIS, AND M. MOSHINSKY. Canonical<br>Transformations to Action and Angle Variables and Their Representa-<br>tion in Quantum Mechanics. IV. Periodic Potentials . . . . . | 156 |
| M. S. HUSSEIN AND G. C. MARQUES. Symmetrical Representation of the<br>Transition Matrix. I. Formal Development . . . . .                                                                              | 191 |
| M. GRABIAK, B. MÜLLER, AND W. GREINER. Geometrical Properties of<br>Gauge Theories . . . . .                                                                                                          | 213 |
| ABSTRACTS OF PAPERS TO APPEAR IN FUTURE ISSUES . . . . .                                                                                                                                              | 243 |

NUMBER 2, DECEMBER 1986

|                                                                                                                                                                                   |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| R. AKHOURY AND A. COMTET. Hidden Supersymmetry and Spectral Asym-<br>metry: Fermion Number Fractionization and Anomalies in Even and<br>Odd Dimensions . . . . .                  | 245 |
| G. MORCHIO AND F. STROCCHI. Confinement of Massless Charged Par-<br>ticles in $QED_4$ and of Charged Particles in $QED_3$ . . . . .                                               | 267 |
| A. I. KARANIKAS, C. N. KTORIDES, AND N. E. MAVROMATOS. Study of the<br>Phase Structure of Abelian Field Theories through Non-lattice, Non-<br>perturbative Calculations . . . . . | 280 |
| R. C. MYERS AND M. J. PERRY. Black Holes in Higher Dimensional Space-<br>Times . . . . .                                                                                          | 304 |
| M. ROČEK, P. VAN NIEUWENHUIZEN, AND S. C. ZHANG. Superspace Path<br>Integral Measure of the $N=1$ Spinning String . . . . .                                                       | 348 |
| LEONARDO CASTILLEJO, ALFRED S. GOLDBABER, ANDREW D. JACKSON, AND<br>MIKKEL B. JOHNSON. Dinotor Model for Anomalous Nuclei . . . . .                                               | 371 |

|                                                                                                                           |     |
|---------------------------------------------------------------------------------------------------------------------------|-----|
| HYUNGGYU PARK, EBERHARD K. RIEDEL, AND MARCEL DEN NIJS.<br>Anisotropic Honeycomb Domain Wall Networks in Uniaxial Systems | 419 |
| DANNY BIRMINGHAM AND SIDDHARTHA SEN. The Candelas-Weinberg<br>Model for Spaces $M^4 \times S^{2N}$                        | 451 |
